E twinning project
Let's go international!

Short description:

The project involves 4 classes belonging to two different schools, one located in Italy and one in France. They are both vocational schools and the project is conceived as an exchange of videos in English regarding the students' school life, daily routine and professional activities. The general tone of the videos is meant to be "young and fresh": students are supposed to talk about themselves and their school activities in a very straightforward and sincere way.

Language:

English

Age range:

16-19

Students involved:

50-100

Subjects involved:

English, professional subjects, IT, Technology, Food industries, Mechanics

Instruments:

other software (videos), email, twinspace, chat, videoconference

Objectives:

Motivate the students to improve their language skills, start building an international dimension collaborating with partners from a foreign country, give the students the opportunity to collaborate for a common goal, get in touch with pupils with a different culture, exchange ideas and knowledge related to the professional areas involved.

Procedure:

We intend to communicate by email, on Skype/Twinspace to organize our activities. Students are supposed to create and exchange videos connected with some particular topics (daily routine, school structure, professional activities) and, possibly, to get in touch with one another to collaborate to carry out some simple tasks using English language.

Results:

Increase the students' motivation, improve the pupils' language skills and their ability to collaborate and work in team.
